

# Symmetry™ 800 Card Readers

*Cutting-Edge Readers for  
the Latest Card Technologies*

[www.amag.com](http://www.amag.com)

## Product Overview

The Symmetry Series 800 range of readers includes proximity, smart card and fingerprint readers compatible with the multiNODE range of controllers and the latest card technologies. All readers are easy to install and are available in a number of attractive designs.

Series 800 readers are the perfect choice for installation professionals who require total system security. Unlike traditional Wiegand interface readers, which are susceptible to undetected tampering, Series 800 readers use bi-directional pseudo-random supervised communications. This enables alarms to be generated if the reader or cable is tampered with or communication is lost.

The Series 800 range includes the Symmetry S844, which reads contactless FIPS 201 PIV smart cards. The Symmetry S844 is designed to comply government standards and is on the GSA FIPS 201 Approved Products List.

The Symmetry S843, S844 and S853 readers are compatible with Philips® MIFARE® DESfire smart cards, which could be used not only for access control, but also for applications such as identity checking, cash-less vending and government applications.

Series 800 readers can be sited long distances from their control units, making them the ideal choice for installers who require installation flexibility.

## Key Features

- Easy to install, with standard mountings
- Wallswitch, micro footprint and keypad versions
- Support for HID®, Philips® MIFARE DESfire, Texas Instruments™, PIV and CAG-NG custom card formats
- Supervised communications for tamper monitoring
- Support for Common Access Cards (CACs)
- Compatible with other Symmetry hardware and software
- LCD models give text-based user feedback and instructions
- Integral buzzer for door-held alarm
- Able to be located up to 3000ft (1Km) from controller if powered locally (or 900ft/300m if powered by controller)
